Product Development and Design

Finding a solution begins with the customer's enquiry.

In the first phase, creative processes are started to offer the customer the best possible solution. When brainstorming finishes the first product sketches are generated to visualise the ideas. These create the basis for the technical preparation. At this point virtual models of the future product are made which contain all the details for the subsequent processes. The next step consists of building a prototype which is most often produced using 3D printing. Already at this stage the customer can see the final look of the product. The prototypes serve as product controls on which the customer can still make changes and corrections where necessary. Once approval has been received from the customer the models among other things are used to build the tooling. In the final step the finished product is created.

Tool Production

So that the various plastic processing methods can be used, we make the required tools ourselves, e.g. punches for PVC processing, extrusion tools for extruded products, vacuum forms and injection moulding tools. The files for creating these are defined using models from product development. With the help of tool production, third party tools can be adapted to and used with our machines.

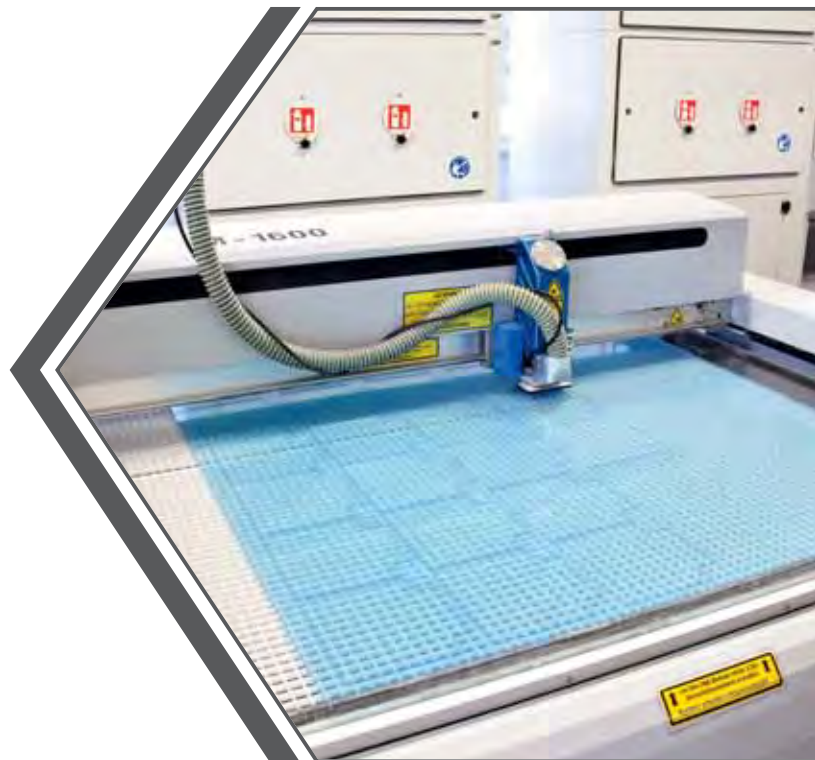

Extrusion

VKF Renzel offers both mono- and co-extrusions as well as the possibility to manufacture tri- and quad-extrusions. We keep over 250 types of scanner profile in stock. Among them are various profiles for electronic pricing. Benefit from our experience. Use our profile to make your products stand out at the point of sale.

Acrylic Processing

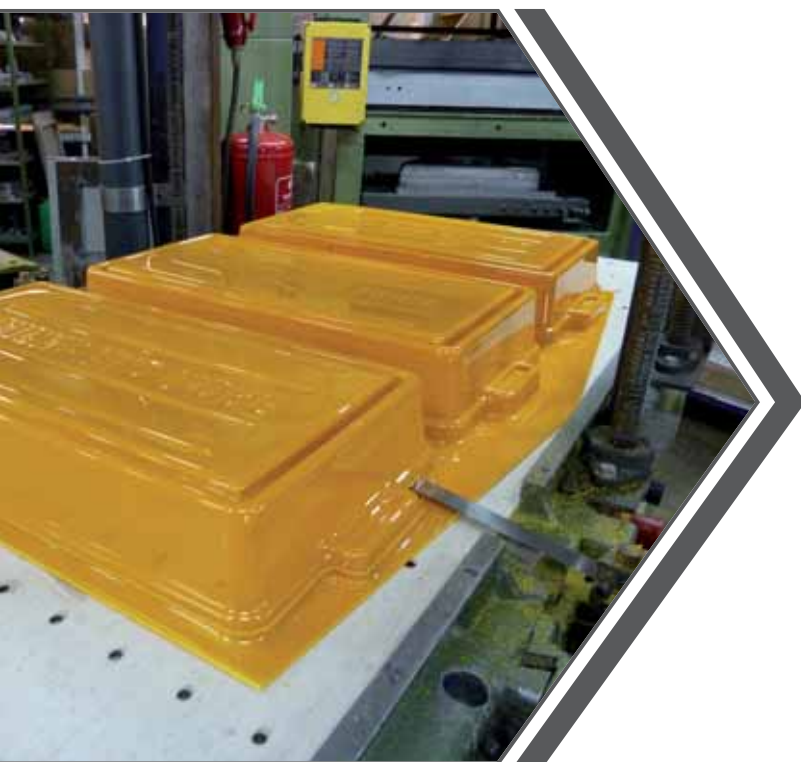

We use the most different processing techniques for our acrylic products, in order to guarantee the highest standards of quality. With lasering, CNC routing, polishing, folding, gluing and assembling, the raw acrylic is converted to to the perfect shape. From the combination of machine precision and practised hand work, the most complicated shapes are created from semi-manufactured parts which distinguish themselves through their brilliance and durability. The service we provide our customers is further increased with the option for bespoke manufacturing.

Injection Moulding

Injection moulding allows immediately usable parts to be manufactured in large quantities. The material is injected in to an injection moulding tool with an injection moulding machine. The hollow space within the tool defines the shape and surface structure of the finished product. Products weighing anywhere from a few tenths of a gram up to 10 kg or so can be produced. On injection moulding machines with a closing force between 250 kN and 4200 kN, we process thermoplastics in single and multi component processes up to a weight of 1936 g.

Thermoforming

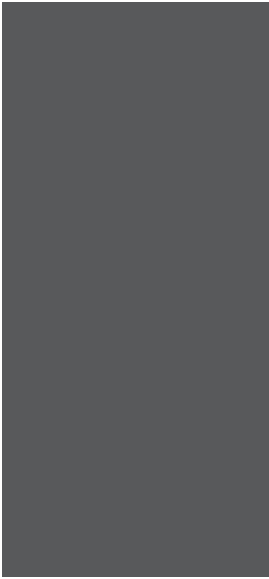

Deep drawing or thermoforming is a process where the heated plastic is drawn in to a negative form with the help of a vacuum. When cooled, the plastic hardens and retains its shape.

Print and Finishing

We use the newest computer systems for print preparation to create digital files and send them to our in-house print workshop. Here, screen, digital, transfer, pad and textile printing processes are used so that we can print many of our products according to your specifications.

troniTAG

troniTAG Label

EPOS Rail troniTAG "Universal"

With adhesive tape, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0155.

EPOS Rail troniTAG "Universal" with hinge

To adhere, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0193.

EPOS Rail troniTAG "Tego"

For Tegometal shelves, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

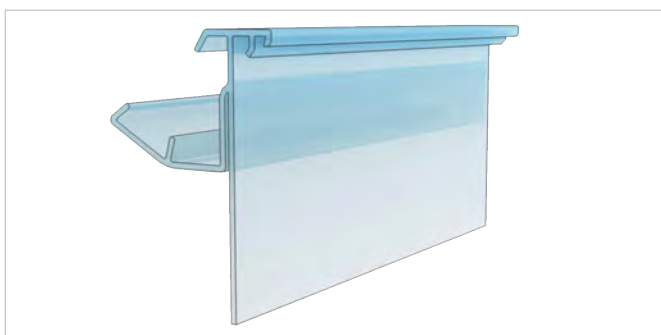

28.0164.

EPOS Rail troniTAG "Tego" with hinge

For Tegometal shelves, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0192.

EPOS Rail troniTAG "TLS"

For Linde, Storebest, Tego and Adams shelves, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0167.

EPOS Rail troniTAG "TLS" with hinge

For Linde, Storebest, Tego and Adams shelving, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0191.

EPOS Rail troniTAG "TLS / LED"

For Linde, Storebest, Tego and Adams shelving, without hinge, available in different colours and for various label sizes from 1.5" to 7.4", incl. insert option for an LED rail

28.0341.

EPOS Rail troniTAG "Wanzl / Wire-Tech"

For Wanzl and Wire-Tech wire shelves with two horizontal wires, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0175.

EPOS Rail troniTAG "Wanzl / Wire-Tech" with hinge

For Wanzl and Wire-Tech wire shelves with two horizontal wires, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0194.

EPOS Rail troniTAG "Otto-Kind"

For Otto-Kind shelves, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0161.

EPOS Rail troniTAG "Otto-Kind" with hinge

For Otto-Kind shelving, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0195.

EPOS Rail troniTAG "Madix / Lozier"

To slot in to existing C-profiles in metal or plastic, for Madix, Lozier, Alser, Linde and York shelving, without hinge, available in different colours and various label sizes from 1.5" to 7.4"

28.0165.

EPOS Rail troniTAG "Madix/Lozier" with hinge

To slot in to existing C-profiles in metal or plastic, for Madix, Lozier, Alser, Linde and York shelving, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0315.

EPOS Rail troniTAG "HAM"

For ITAB, Hansa Mertens, Hermes, Detroit and Fortezza shelving, without hinge, available in different colours and for various sizes of label 1.5" to 7.4"

28.0196.

EPOS Rail troniTAG "HAM" with hinge

For ITAB, Hansa Mertens, Hermes, Detroit and Fortezza shelving, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0197.

EPOS Rail troniTAG "GLS"

For 5-10 mm glass and wooden shelves, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0176.

EPOS Rail troniTAG "GLS" with hinge

For 5-10 mm thick glass and wooden shelves, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0198.

EPOS Rail troniTAG "ANT"

For 18-22 mm wooden and metal shelves, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0177.

EPOS Rail troniTAG "ANT" with hinge

For 18-22 mm thick wooden and metal shelves, with hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0199.

EPOS Rail troniTAG "Korb" without Bracket

For Wanzl, Siegel and other wire baskets, glass risers and cupboards, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0178.

More products can be found on our website www.esl-fittings.com.
All profiles are available with a hinge function.

EPOS Rail troniTAG "Korb" with bracket

For Wanzl, Siegel and Tego hanging baskets and stacking baskets, without hinge, available in different colours and for various label sizes from 1.5" to 7.4"

28.0200.

Pegwall Hook Adapter for troniTAG Labels

For pegwall hooks with price holder above, for various label types
Colour: white

28.0174.1

1. With the help of the positioning element affixed to the reverse, the angle of the pegwall hook adapter can be adjusted.

troniTAG Integrated Labels

troniTAG Integrated Label

In co-operation with the company troniTAG, VKF Renzel GmbH has developed an EPOS rail which is compatible with the troniTAG integrated labels. The rail protects the ESLs from dust, dirt and splashes as well as offering a direct electricity supply. The electricity supply can be from a battery pack or a power rail (p. 58).

Lighting Set with Inner Electrical Rail

- Invisible power supply for illumination for products at the point of sale.
- The lower voltage electrical rail can be slid in to the shelving column without the need for tools.
- Easy assembly as there is no need to lay cables.
- A small adapter links the LED lighting on the shelf through the column perforations with the electrical rail.
- Through the Plug-and-Go system the shelves can be repositioned at any time.
- The system offers professional lighting for glass, wire, metal and wooden shelves.

Width: 970 mm

Lighting set for shelving with 5 levels, 1000 mm shelf width, 80 x 30 mm column and H holes

Consists of:

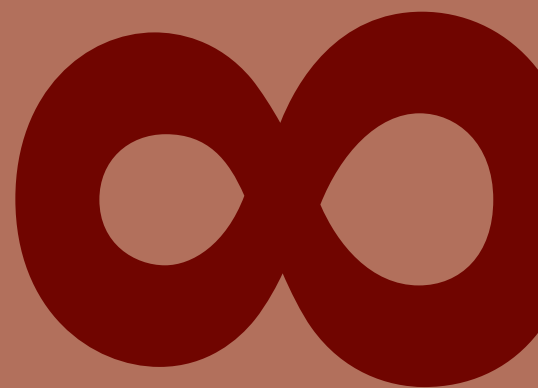

- 1x INWI inner power rail 1300 mm long + 1 bag of accessories
- 5x LED lighting rails 970 mm long
- 5x holding clip set
- 5x adapter plug 28
- 1x mains adapter

10.0384.4

The power rails, adapters, lighting units and holders are available in other styles to suit your shelving system.

Accessories

Shelf barkers liven up your shop so that it becomes more interesting for customers. You are signalling to your customers to buy at good value and to always find new products. We offer a whole range of shelf barkers. We can produce nearly every shape and colour. Whether offset, screen or digital print - we have a printing technique for every quantity! Give us a call or email / fax us your sketches.
